CLINICAL DATA

- Self Referral

Pt seen alone- collateral information from parents over phone
37 yrs old married man, studied B Tech, M Tech (Mechanical Engineering), Ph D incomplete (studied for 5 yrs), native of Bihar, moved to Bangalore a year ago.
He has a younger brother (32yrs old, unmarried, pursuing MBA, live in Canada). Father is 67yrs old (Retd bank employee), mother is 63 yrs old (Home maker). He is married for 3 yrs, spouse is 30yrs old (Completed her Ph D). No children yet. He stays alone. Mother is currently staying with him since 2 months. Spouse will be coming in a week.

Received 2 doses of covid vaccination. H/o covid in 2020, home isolation
K/c/o Hypothyroidism -2 yrs, on Tab Thyronorm 100mcg; Recently diagnosed HTN (a month ago) on medications. No surgical history.
OSA using CPAP machine.
F/h/o paternal grand father had ? mental health issue
No h/o head injury/seizure.

Childhood history: No significant issues in attention and concentration/ no behavioural issues. No significant academic difficulties. However, needed prompting to manage time and organizing his activities. Limited interest in extra curricular activities. No issues in socializing.

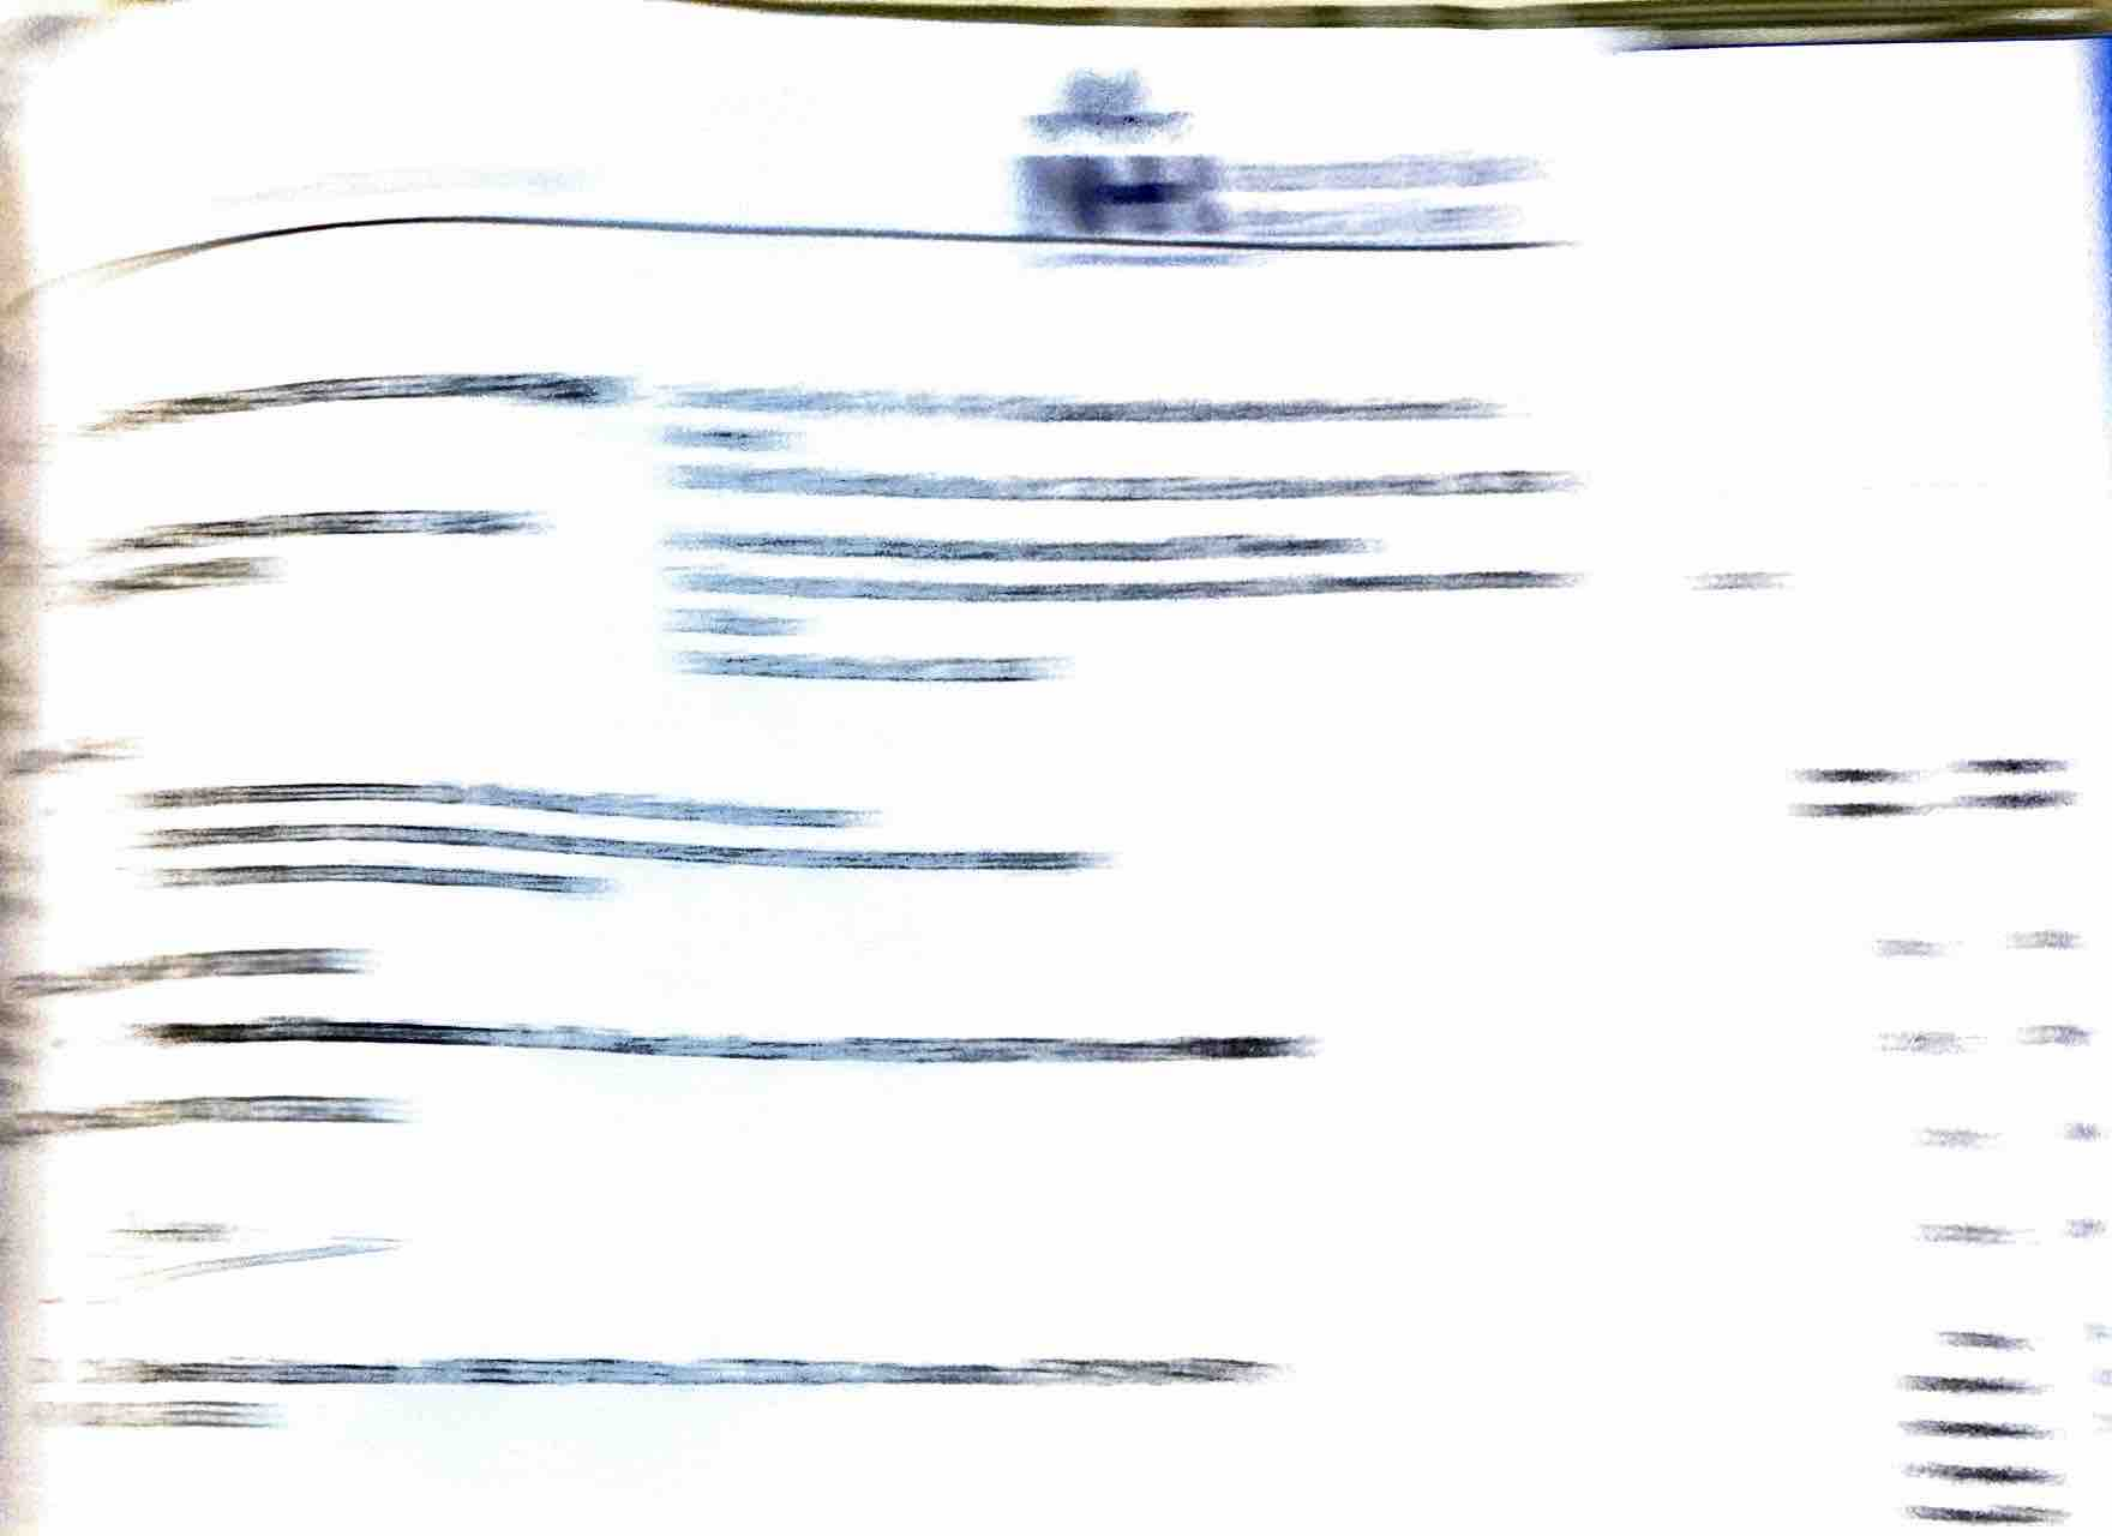

H/o Cannabis use for 2 yrs, 1-2 joints/day. Stopped in 2011.
H/o smoking, 2005 to 2019, 10 cigarettes/day. No recent relapse. Family is protective factor.
No other substance abuse history.

While pursuing M Tech (2011) pt had sudden onset of c/o paranoia-fearfulness, hearing of voices, behavioural changes, irritability/ withdrawn behaviour/ avoidance to social interaction, impaired functionality. Had significant academic difficulties, however, he was able to complete his M Tech course. Couldn't get job for a year. had low confidence.
He joined Ph D in 2012, continued for 5 yrs, however, he had significant difficulties in completing his PhD- poor concentration, procrastination, had paranoia impacting his social and academic functioning. Hence, he discontinued his studies.

Treatment history: Treated as substance induced psychosis/ schizoaffective disorder, on medications since 2011. No inpatient admission. CT brain was done-8/3/2014. Normal.
Past medications: Amisulpride (300mg), Encorate chrono 500mg, Quetiapine 50mg, Escitalopram 30mg, Sertraline 100mg. Reported significant improvement in paranoia, withdrawn behaviour.

Changes of medication in 2019. Tab Oipiprazole 100mg 1-0-0, Tab Methylphenidate 20mg 1-0-0, Tab Vilazodone 20mg 0-0-1, Tab Lurasidone 40mg 0-0-1.
